Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102/103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-8, 23-24, 26-32, 41-49 and 64 are rejected under 35 U.S.C. 102(a) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over HOFFMAN (WO 03/099548 A1) published December 4, 2003.

HOFFMAN discloses a laminated composite sheet used for applications such as disposable cups, plates, and beverage containers, among others. (Refer to page 1) On Figure 3, the reference shows a composite 30 with two plies bonded by an adhesive 32, in which the plies include a cellulosic substrate 1 and a film (34 and 36). (Refer to pages 9-11) The reference teaches that the cellulosic substrate is formed by bleached, virgin or recycled pulp and cellulosic fiber and has a basis weight in the range of about 4 to 20 lbs per 1000 sq. feet. [12-60 lbs/3000 sq. feet] (Refer to page 9, last paragraph). The reference further teaches the use of polyethylene or polypropylene films. (Page 10)

The Examiner equates the cellulosic substrates 1 to the web of fibers of the plies of the present invention and the film layers 34 and 36 to the claimed first and second films.

Although HOFFMAN does not explicitly teach the claimed property of Canadian Standard Freeness of the cellulosic fibers, it is reasonable to presume that this property is inherent to fibers of HOFFMAN. Support for said presumption is found in the use of like materials (i.e. uses cellulosic fibers from pulp). The burden is upon Applicant to prove otherwise. *In re Fitzgerald* 205 USPQ 594. In addition, the presently claimed property of a Canadian Standard Freeness of between 200 cm³ and 500 cm³ would obviously have been present once the HOFFMAN product is provided. Note *In re Best*, 195 USPQ at 433, footnote 4 (CCPA 1977) as to the providing of this rejection made above under 35 USC 102.

4. Claims 9-22, 25, 33-40 and 50-63 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
